PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience developing web, backend, and mobile applications using Java, JavaScript, React, Spring Boot, REST APIs, and AWS. Experienced in building responsive user interfaces, integrating backend services, automating deployments, and developing Android applications. Holds an MS in Information Systems and has recent hands-on experience building full-stack applications with Node.js and MongoDB.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, Kotlin, C, C++, Bash/Shell
Frontend: React, React Native, Redux, HTML5, CSS3, SCSS
Backend: Spring Boot, Spring MVC, Node.js, Express.js, Hibernate, J2EE, Microservices, REST APIs
Mobile: Android SDK, Kotlin, Java, XML, MVVM, Retrofit
Cloud & DevOps: AWS EC2, Lambda, S3, DynamoDB, RDS, CloudFormation, AWS CLI, Jenkins, GitHub Actions, CI/CD
Databases & Messaging: SQL, NOSQL, MySQL, SQLite, MongoDB, Redis, Elasticsearch, RabbitMQ
Tools & Practices: Linux, macOS, Windows, Git, GitHub, GitHub Copilot, GitLab, Gemini (Android Studio), Postman, Jira, Agile methodologies, JUnit, Data Structures & Algorithms, Unit testing

PROFESSIONAL EXPERIENCE:

Verans Business Solutions Inc. — Software Engineer | *Remote, USA* | *Feb 2024 – Feb 2025*
- Developed responsive web application features using React, JavaScript, Node.js, HTML5, and CSS3, leveraging reusable NPM components to maintain consistent UI patterns across application screens.
- Configured Jenkins CI pipelines and supported release readiness through code reviews, unit and regression testing, and development-branch deployments.

Alliant Infotech — Software Developer | *India* | *Jul 2020 – Jul 2021*
- Built responsive client-side features with React and JavaScript, creating reusable UI components to support consistent layouts and reduce duplicated frontend code.
- Developed Node.js APIs using AWS Lambda and automated deployments with Shell scripts and CI/CD pipelines, standardizing deployment steps and reducing manual release work.
- Analyzed customer feedback with cross-functional teams and used findings to prioritize application improvements and streamline development workflows.

Empower Solutions — Software Engineer | *India* | *Nov 2019 – Jun 2020*
- Enhanced a React Native driver-dispatch application by implementing mobile features, resolving defects, and writing unit tests. Developed AWS Lambda functionality to support driver and route workflows.
- Implemented Redux-based state management in React Native and developed Spring Boot REST APIs to support communication between mobile clients and backend services.

Sjain Ventures Limited — Android Developer | *India* | *Aug 2018 – Jul 2019*
- Developed Android HR application features for employee attendance, timesheets, leave management, and salary information using Kotlin, Android SDK, and XML layouts.
- Implemented REST API integrations for Android application features and supported Google Play Store releases, production fixes, and ongoing app maintenance.

Dalmet Technologies Pvt. Ltd. — Software Engineer | *India* | *Apr 2017 – Mar 2018*
- Developed Android application features in Java, integrating REST APIs and using asynchronous programming and multithreading to handle background operations.
- Implemented QR code scanning and database integration in an Android application to support data capture and retrieval within the mobile workflow.

PROJECTS

AWS (Academic Project):
- Designed and deployed scalable AWS cloud infrastructure using Infrastructure as Code (IaC) with CloudFormation, provisioning EC2, Lambda, RDS, and S3 services.
- Implemented automated CI/CD pipelines using GitHub Actions to streamline build, testing, and deployment workflows.

Full-Stack Software Development (Project):*(LLM Integration, Ollama, Llama 3.2, AI Application Integration)* | *2025 – 2026*
- Built a full-stack recipe and meal-planning platform using React, Node.js, Express.js, and MongoDB, implementing recipe search, ratings, favorites, and meal-planning workflows.
- Implemented JWT-based authentication and role-based access control for protected application features, with Cloudinary integration for recipe image management.
- Developed an Android application using Kotlin, MVVM, Retrofit, and REST APIs, integrating authentication, search, favorites, meal planning, and integrated Ollama-based AI chat for conversational assistance and personalized meal recommendations.

EDUCATION

Northeastern University, USA — *Jan 2022 – Dec 2023*
Master of Science in Information Systems, 3.75/4 GPA

Ujjain Engineering College, India — *Aug 2011 – May 2015*
Bachelor of Engineering in Electronics & Communication Engineering
