PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience developing frontend, backend, and mobile applications. Master of Science in Information Systems with hands-on experience designing, building, testing, and deploying full-stack software solutions using Java, JavaScript, React, Node.js, Kotlin, and AWS. Experienced in building responsive user interfaces, RESTful APIs, database-driven applications, cloud-based services, CI/CD pipelines, and Android applications. Strong foundation in OOP, data structures and algorithms, software architecture, system design, and Agile development.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, Kotlin, C, C++, C#, Bash/Shell

Frontend: React, React Native, Redux, HTML5, CSS3, SCSS, jQuery, AJAX

Backend: Spring Boot, Spring MVC, Node.js, Express.js, Hibernate, J2EE, REST APIs, Servlets

Mobile: Android SDK, Kotlin, Java, XML, MVVM, Retrofit, Jetpack, Coroutines

Cloud & DevOps: AWS (EC2, Lambda, S3, DynamoDB, RDS, CloudFormation), AWS CLI, Jenkins, GitHub Actions, CI/CD

AI / GenAI: Generative AI, LLM Integration, Prompt Engineering, Ollama, Llama 3.2, AI Application Integration

Databases & Messaging: MongoDB, MySQL, SQLite, Redis, Elasticsearch, RabbitMQ

Tools & Practices: Git, GitHub, GitHub Copilot, Gemini (Android Studio), Android Studio, IntelliJ IDEA, VS Code, Postman, Jira, Agile/Scrum, Unit Testing

Concepts: OOP, Data Structures & Algorithms, Design Patterns, Software Design & Architecture, SDLC

PROFESSIONAL EXPERIENCE: Software Engineer (5 years of experience)

Verans Business Solutions Inc. — Software Engineer | Remote, USA | Feb 2024 – Feb 2025

- Developed user-centric web applications using React, JavaScript, HTML5, CSS3, and reusable NPM components based on stakeholder requirements and design specifications.
- Improved development quality and delivery by configuring Jenkins CI pipelines, participating in code reviews, performing unit/regression testing, and managing development deployments.

Alliant Infotech — Software Developer | India | Jul 2020 – Jul 2021

- Developed responsive client applications using React and JavaScript, applying reusable components and frontend best practices to improve user experience.
- Automated deployment of AWS Lambda APIs using Shell scripts and integrated CI/CD pipelines to improve deployment efficiency and cloud resource utilization.
- Collaborated with cross-functional teams to analyze customer feedback and optimize development workflows, contributing to an increase in customer satisfaction and a reduction in project completion time.

Empower Integrated Solutions — Software Engineer | India | Nov 2019 – Jun 2020

- Developed and enhanced cross-platform mobile applications using React Native, implementing new features, bug fixes, unit testing, and AWS-based functionality.
- Implemented Redux for application state management and developed RESTful APIs using Spring Boot while working in an Agile environment with Jira and Git.

Sjain Ventures Limited — Android Developer | India | Aug 2018 – Jul 2019

- Developed Android applications using Java, Kotlin, XML, Android SDK, and software design patterns throughout the software development lifecycle.
- Developed backend REST APIs and deployed and maintained mobile applications on the Google Play Store, supporting production releases and application maintenance.

Dalmet Technologies Pvt. Ltd. — Software Engineer | India | Apr 2017 – Mar 2018

- Developed secure Android applications using Java, multi-threading, asynchronous programming, MongoDB, REST APIs, and SQLite to improve application performance and data management.
- Built Android features including QR code scanning and database integration, improving application functionality and user engagement.

EDUCATION

Northeastern University, USA

Jan 2022 - Dec 2023

Master of Science in Information Systems, 3.75/4 GPA

ACADEMIC PROJECTS

Web Technologies: Developed a user-friendly web app (*Movie Maven*) using React, Node.js, HTML, SCSS, and RESTful APIs, with features such as login, movie browsing, reviews, and search.

AWS Cloud Solutions: Designed and deployed scalable cloud infrastructure using AWS services (EC2, Lambda, RDS, S3) and CloudFormation, with automated CI/CD pipelines via GitHub Workflows.

PROJECTS

Full-Stack Software Development (2025 – 2026)

- Built a Smart Meal Planner using React, Node.js, Express.js, MongoDB, JWT, and Ollama AI, implementing recipe management, search, ratings, favorites, Cloudinary, and personalized meal planning.
- Developed an Android client using Kotlin, XML, MVVM, Retrofit, Coroutines, and REST APIs, integrating authentication, recipe discovery, favorites, meal planning, and AI assistant features.
