PROFESSIONAL SUMMARY

Software Engineer with 5+ years of experience developing web, backend, and mobile applications using React, JavaScript, Node.js, Java, and AWS. Experienced in end-to-end application development, including responsive front-end interfaces, scalable backend services, SQL and NoSQL database integration, secure authentication and role-based authorization, and CI/CD automation. Holds an MS in Information Systems and has recent hands-on project experience building a full-stack application with AI integration.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, Kotlin, C, C++, Bash/Shell
Frontend: React, React Native, Redux, HTML5, CSS3, SCSS
Backend: Node.js, Express.js, Spring Boot, REST APIs, Microservices
Mobile Development: Android SDK, Android UI (XML), MVVM, Retrofit
Cloud & DevOps: Linux, AWS (EC2, Lambda, S3, DynamoDB, RDS, CloudFormation, AWS CLI), Jenkins, GitHub Actions, CI/CD
Databases & Messaging: MongoDB, MySQL, SQLite, Redis, Elasticsearch, RabbitMQ, SQL/NoSQL
Developer Tools & Testing: Git, GitHub, GitLab, Postman, Jira, JUnit, Unit Testing, GitHub Copilot, Gemini (Android Studio)
Methodologies & Concepts: Agile Development, Agile/Scrum, Object-Oriented Programming (OOP), Data Structures & Algorithms

PROFESSIONAL EXPERIENCE

Verans Business Solutions Inc. — Software Engineer ***Feb 2024 – Feb 2026***

- Developed reusable React dashboard components and integrated REST APIs using Axios to manage client and project data and visualize performance metrics with Chart.js.
- Built Node.js/Express APIs backed by MongoDB/Mongoose, implemented JWT authentication and role-based authorization, and supported Jenkins CI/CD pipelines.

Alliant Infotech — Software Developer ***Jul 2020 – Jul 2021***

- Developed responsive web application features using React, JavaScript, HTML, and CSS, building reusable UI components for client-facing workflows.
- Developed and deployed Node.js APIs using AWS Lambda, automated deployments with Shell scripts and CI/CD pipelines, and collaborated with cross-functional teams to prioritize customer feedback and deliver targeted software improvements, contributing to a reported 15% increase in customer satisfaction and an 18% reduction in project completion time.

Empower Solutions — Software Engineer ***Nov 2019 – Jun 2020***

- Developed 12+ production-ready screens for the hybrid app using React Native and Redux, integrating real-time passenger, pickup/drop-off, and navigation data to improve data accessibility and application responsiveness.
- Built and integrated secure REST API endpoints and event-driven AWS Lambda functions using Node.js, optimizing dispatch workflows to expand route capacity by 18% and reduce driver idle time by 12 minutes per trip.

Sjain Ventures Limited — Android Developer ***Aug 2018 – Jul 2019***

- Developed Android features across 8+ applications using Java, Kotlin, Android SDK, and XML, integrating REST APIs and implementing authentication, OTP verification, payment workflows, and UI enhancements.
- Implemented 10+ modules for SJain ERP, including attendance, timesheets, leave management, salary, employee profiles, and lead management, delivering API-connected features and supporting Google Play Store deployments.
- Coordinated development across a team of 7+ frontend and backend developers, assigning tasks, tracking progress, preparing project estimates and technical documentation, and supporting junior developers.

Dalmet Technologies Pvt. Ltd. — Software Engineer ***Apr 2017 – Mar 2018***

- Developed Android features across 3 applications using Java, Android SDK, and XML, leveraging asynchronous programming and multithreading to support responsive application workflows and efficient data processing.
- Designed and developed the Android application using Java and SQLite, implementing CRUD operations, dynamic forms, and QR code generation/scanning for secure information sharing, contributing to a reported 25% increase in user engagement.

PROJECTS

Smart Meal Planner — Full-Stack & AI Application | GitHub ***Mar 2026 – Present***

- Developed an Android application with 11 major screens using Kotlin, MVVM, Retrofit, and REST APIs, implementing authentication, recipe discovery, search, favorites, and personalized weekly meal planning.
- Built 17+ REST API endpoints using Node.js, Express.js, and MongoDB, integrating Ollama/Llama 3.2 for AI-powered recipe assistance alongside JWT authentication, role-based access control, search/filtering, and Cloudinary image uploads.
- Developed a React admin panel for secure login and recipe management, enabling administrators to create, update, and manage recipe content.

AWS Cloud Infrastructure & CI/CD — Academic Project | GitHub

- Provisioned scalable AWS infrastructure using Infrastructure as Code (IaC) with CloudFormation, configuring EC2, Lambda, RDS, and S3 to support application deployment and cloud resource management.
- Implemented automated CI/CD pipelines using GitHub Actions to streamline build, testing, and deployment workflows.

EDUCATION

Northeastern University, USA ***Jan 2022 – Dec 2023***
Master of Science in Information Systems, 3.75/4 GPA

Ujjain Engineering College, India ***Aug 2011 – May 2015***
Bachelor of Engineering in Electronics & Communication Engineering
